Summary

Senior Front-End Developer with 8+ years delivering production web products across fintech, cryptocurrency, e-commerce, and corporate environments. Specializes in Vue.js/Nuxt.js and React/Next.js, with practical full stack experience building REST APIs and database-backed services using Laravel, Python, and SQL.

Technical Skills

- **Front-End:** HTML5, CSS3, JavaScript (ES6+), TypeScript, Vue.js, Nuxt.js, React, Next.js, Pinia, Redux, Zustand, Tailwind CSS, SCSS, Vuetify, PrimeVue
- **Back-End & APIs:** PHP, Laravel, Python, Django, Flask, FastAPI, Node.js, REST APIs, authentication
- **Data & Real-Time:** MySQL, PostgreSQL, SQLite, WebSockets, Server-Sent Events (SSE)
- **Testing & Tools:** Vitest, Cypress, Jest, Git, GitHub, GitLab, Jira, Docker, PM2, npm, Yarn, ESLint, Prettier, Figma
- **Engineering:** Responsive design, performance optimization, technical SEO, Core Web Vitals, PWAs, internationalization, front-end architecture

Professional Experience

Senior Front-End Developer — **BitBank Company** — Feb 2025 – Jan 2026

- **Built a reusable JavaScript support widget** with automated builds and iframe integration for Next.js and Vue applications, including BitBank3.com.
- **Implemented multilingual support** for a cryptocurrency exchange platform.
- **Delivered Sim Pay PWA payment flows** for Paya, card-to-card, Satna, and Pol transactions, including payment-link generation.
- **Implemented video verification and face detection** for KYC onboarding.
- **Improved technical SEO** for a Next.js landing page with sitemap and canonical URL implementation.
- **Built Sim Pay admin reporting** with interactive charts and Excel/PDF exports.

Senior Front-End Developer — **Sarmayex** — Jun 2024 – Feb 2025

- **Developed trading and engagement features** including pre-market trading, lending, demo trading, a prize wheel, and a Telegram Mini App for a platform serving 1M+ users.
- **Resolved TradingView chart and transaction issues** and improved responsive layouts.
- **Implemented request caching and Server-Sent Events (SSE)** for real-time market data, reducing server load and improving responsiveness.
- **Built an update log** to communicate product features and improvements with each release.

Senior Front-End Developer — Mega — Sep 2023 – Jun 2024

- **Delivered the company website** with Nuxt 3, advanced animations, and page transitions; refactored components to improve maintainability.
- **Built a reusable multi-carousel component** without external dependencies.
- **Automated bundling API-generated PDFs** into ZIP archives with JSZip.
- **Built an internal product-management panel** with PrimeVue and led front-end testing workshops.

Front-End Developer — Ayandeh Bank — Aug 2021 – Jul 2023

- **Led front-end development for FinnoTex**, a trading platform supporting spot, limit, and OTC trading.
- **Built the front end for FinnoBot**, a subscription trading platform integrated with Binance, KuCoin, and other exchanges, including asset allocation, analysis, and automated orders.
- **Implemented encrypted API communication and two-factor authentication (2FA)** to strengthen platform security.
- **Added real-time notifications** using WebSockets.

Full Stack Web Developer — Cactus ICT Center — Jul 2019 – Jun 2021

- **Improved cross-device and cross-browser support** for responsive websites, increasing mobile engagement by 30%.
- **Reduced page load times by 25%** through performance optimization and improved SEO rankings.
- **Developed a guest-ordering flow** that increased registrations by 35%.
- **Built a customizable online-ordering system**, increasing online orders by 25% and user satisfaction by 15%.

Freelance Full Stack Developer — Contract Projects — Jul 2017 – Present

- **Delivered contract web applications end to end** from interface implementation through API and database integration, deployment, and production maintenance.
- **Built Laravel REST APIs** with CRUD workflows, authentication, and admin panels.
- **Developed Python APIs and services** with Django, Flask, or FastAPI to meet project requirements.
- **Designed relational data models** using MySQL, PostgreSQL, or SQLite, and integrated payment services, third-party APIs, and Firebase.

Selected Projects

- BitBank3.com Multilingual cryptocurrency exchange built with Vue.js and Next.js.
- Market.Sarmayex.com Real-time trading platform using SSE and request caching.
- MegaGroup.ir Corporate website built with Nuxt 3, Vue.js animations, and technical SEO.
- IraneCar.com Automotive marketplace with listings, search filters, and performance optimization.
